

Upper San Joaquin River Basin Storage Investigation

Draft Phase 1 Investigation Report

Initial Surface Storage Options Screening

Prepared for

U.S. Bureau of Reclamation

Mid Pacific Region

By

January 2003

UPPER SAN JOAQUIN RIVER BASIN

STORAGE INVESTIGATION

Draft Phase 1 Investigation Report In-Progress Review

Initial Surface Storage Options Screening

TABLE OF CONTENTS

CHAPTER 1. INTRODUCTION	1-1
BACKGROUND	1-1
CALFED Guidance for Storage in the Upper San Joaquin River Basin.....	1-1
STUDY AUTHORIZATION	1-2
Federal Authorization.....	1-2
State of California Authorization	1-2
PURPOSE AND SCOPE OF REPORT	1-2
STUDY AREA	1-3
RELATED STUDIES, PROJECTS AND PROGRAMS	1-3
CHAPTER 2. EXISTING AND FUTURE CONDITIONS	2-1
EXISTING CONDITIONS	2-1
Hydrology.....	2-1
Surface Water Resources in the Study Area	2-3
Friant Division of the CVP	2-3
Friant Division Contract Types and Water Deliveries.....	2-7
Facilities Upstream of Millerton Lake	2-11
Groundwater Resources	2-11
FUTURE WITHOUT-PROJECT CONDITIONS	2-13
Conjunctive Management	2-13
Demand Management	2-13
Exchanges and Transfers.....	2-14
CHAPTER 3. PROBLEMS AND OPPORTUNITIES	3-1
San Joaquin River Ecosystem	3-2
San Joaquin River Water Quality.....	3-3

Surface Water Supply Reliability.....	3-4
Flood Control	3-5
Hydropower.....	3-5
Recreation.....	3-6
Delta Inflows	3-6
CHAPTER 4. PLAN FORMULATION	4-1
PLANNING PROCESS.....	4-2
Phase 1 Study Purpose	4-2
Goals for Storage in the Upper San Joaquin River Basin	4-2
Planning Objectives.....	4-3
Continuation Criteria.....	4-3
EVALUATION TOOLS.....	4-3
OPERATIONS STUDIES.....	4-4
Friant Enlargement Concept Single Purpose Evaluations.....	4-4
San Joaquin River Restoration Single Purpose Evaluations.....	4-6
San Joaquin River Water Quality Single-Purpose Evaluations	4-7
Water Supply Reliability Single Purpose Evaluations.....	4-8
Summary of Friant Enlargement Concept Single-Purpose Evaluations	4-9
APPRAISAL ANALYSIS OF SURFACE STORAGE OPTIONS	4-10
Storage Options Screening Approach	4-10
Initial Screening of Storage Site Options.....	4-10
Modeling of Retained Options	4-12
PUBLIC INVOLVEMENT DURING THE INVESTIGATION	4-13
Stakeholder Workshops.....	4-13
Workshop 1 – Introduction	4-14
Workshop 2 – Approaches and Options	4-14
Working Session – Ecosystem Restoration Flows.....	4-15
Workshop 3 – Storage Options and Modeling Overview	4-15
Future Workshops	4-15
Public Outreach	4-15
CHAPTER 5. SURFACE STORAGE OPTIONS.....	5-1
METHODOLOGY	5-1

SITE SPECIFIC SURFACE STORAGE OPTIONS	5-1
Merced River Watershed - Montgomery Dam and Reservoir	5-4
Description of Option	5-4
Engineering and Environmental Findings	5-4
San Joaquin River Watershed – Raise Friant Dam	5-6
Description of Options	5-6
Engineering and Environmental Findings	5-6
San Joaquin River Watershed - Fine Gold Dam and Reservoir	5-8
Description of Options	5-8
Engineering and Environmental Findings	5-8
San Joaquin River Watershed - Temperance Flat Reservoir.....	5-10
Description of Options	5-10
Engineering and Environmental Findings	5-10
San Joaquin River Watershed - Kerckhoff Lake Enlargement	5-13
Description of Options	5-13
Engineering and Environmental Findings	5-13
San Joaquin River Watershed - Mammoth Pool Reservoir Enlargement	5-15
Description of Options	5-15
Engineering and Environmental Findings	5-15
San Joaquin River Dry Creek Watershed - Big Dry Creek Dam and Reservoir.....	5-17
Description of Option	5-17
Engineering and Environmental Findings	5-17
Kings River Watershed - Pine Flat Dam Raise	5-19
Description of Options	5-19
Engineering and Environmental Findings	5-19
Kings River Watershed - Mill Creek Dam and Reservoir	5-21
Description of Options	5-21
Engineering and Environmental Findings	5-21
Kings River Watershed - Rodgers Crossing Dam and Reservoir	5-23
Description of Options	5-23
Engineering and Environmental Findings	5-23
Kings River Watershed - Dinkey Creek Dam and Reservoir.....	5-25
Description of Options	5-25

Engineering and Environmental Findings	5-25
Kaweah River Watershed - Dry Creek Dam and Reservoir.....	5-27
Description of Options	5-27
Engineering and Environmental Findings	5-27
Kaweah River Watershed - Yokohl Valley Dam and Reservoir.....	5-29
Description of Options	5-29
Engineering and Environmental Findings	5-29
Tule River Watershed - Hungry Hollow Dam and Reservoir.....	5-31
Description of Options	5-31
Engineering and Environmental Findings	5-31
SUMMARY OF INITIAL SCREENING RESULTS.....	5-33
CHAPTER 6. NEXT STEPS.....	6-1
CHAPTER 7. REFERENCES	7-1
GENERAL REFERENCES USED FOR THE INVESTIGATION.....	7-1
ADDITIONAL REFERENCES USED FOR DINKEY CREEK RESERVOIR.....	7-3
ADDITIONAL REFERENCES USED FOR FINE GOLD RESERVOIR.....	7-3
REFERENCES USED IN THE FRIANT DAM ENLARGEMENT TM	7-3
ADDITIONAL REFERENCES USED FOR HUNGRY HOLLOW RESERVOIR	7-4
ADDITIONAL REFERENCES USED FOR MAMMOTH POOL DAM AND RESERVOIR	7-4
ADDITIONAL REFERENCES USED FOR MONTGOMERY RESERVOIR.....	7-4
ADDITIONAL REFERENCES USED FOR PINE FLAT RESERVOIR ENLARGEMENT.....	7-5
ADDITIONAL REFERENCES USED FOR TEMPERANCE FLAT RESERVOIR.....	7-5
ADDITIONAL REFERENCES USED FOR YOKOHL VALLEY RESERVOIR	7-5
CHAPTER 8. GLOSSARY, ABBREVIATIONS, AND ACRONYMS	8-1
GLOSSARY	8-1
ABBREVIATIONS AND ACRONYMS	8-15
APPENDIX A. CALSIM II MODEL MODIFICATIONS FOR INTEGRATION OF FRIANT DIVISION	

LIST OF TABLES

TABLE 2-1 SUMMARY OF RUNOFF IN THE UPPER SAN JOAQUIN RIVER BASIN	2-1
TABLE 2-2 RESERVOIRS ON THE EAST SIDE OF THE SAN JOAQUIN VALLEY	2-4
TABLE 2-4 FRIANT DIVISION LONG-TERM CONTRACTS	2-10
TABLE 2-5 PRODUCTION CONDITIONS IN SAN JOAQUIN VALLEY GROUNDWATER SUB-BASINS	2-11
TABLE 4-1 SUMMARY OF FRIANT ENLARGEMENT CONCEPT RIVER RESTORATION SINGLE-PURPOSE EVALUATIONS.....	4-6
TABLE 4-2 SUMMARY OF FRIANT ENLARGEMENT CONCEPT WATER QUALITY SINGLE-PURPOSE EVALUATIONS.....	4-7
TABLE 4-3 SUMMARY OF FRIANT ENLARGEMENT CONCEPT WATER SUPPLY RELIABILITY SINGLE-PURPOSE EVALUATIONS	4-8
TABLE 4-4 SUMMARY OF STORAGE OPTION INITIAL SCREENING RESULTS.....	4-11
TABLE 5-1 TEMPERANCE FLAT DAM SITE OPTIONS	5-10
TABLE 5-2 SUMMARY OF FINDINGS FROM CONSTRUCTABILITY SCREENING	5-34

LIST OF PREPARERS

NAME

ROLE

U.S. Bureau of Reclamation

Jason Phillips	Project Manager
Chuck Howard	Lead Engineer
Joel Sturm	Geologist
Clarence Duster	Civil Engineer
Mark Pabst	Civil Engineer
Steve Higinbotham	Civil Engineer
Claire Hsu	CALSIM Modeling
Marian Echeverria	Public Involvement

D

California Department of Water Resources

Waiman Yip	Project Manager
Richard Hayes	Civil Engineer, Hydrologist
Jeremiah McNeil	Engineer
Nate Wales	Engineer

R

Montgomery Watson Harza

William Swanson	Project Manager
Stephen Osgood	Planner
Yung-Hsin Sun	CALSIM Modeling
Anna Fock	CALSIM Modeling
David Rogers	Engineering Team Leader
James Herbert	Engineering Geologist
William Moler	Engineering Geologist
Irina Torrey	Environmental Team Leader
Sara Hamm	Environmental Coordination
Philip Unger	Aquatic Biology
David Stevens	Wildlife Biology
Stephanie Murphy	Wildlife Biology
Sandra Perry	Recreational Resources
Barry Anderson	Botany
David White	Cultural Resources
James Darke	GIS Analyst
Steve Irving	GIS Technician
Colleen Montgomery-Lagousis	Document Production

A

CDM

Coral Cavanagh	Public Involvement
Carrie Metzger	Public Involvement

F

Public Affairs Management

Charles Gardiner	Public Involvement
------------------	--------------------

T

MBK Engineers

Walter Bourez	CALSIM Model Development
Dan Steiner - Consultant	CALSIM Model Development
